Scripture Meets Science

Ten Converging Lines of Evidence — One-Page Summary

01 Cosmological Beginnings

The universe had a beginning — and whatever caused it must be beyond space, time, and matter.

02 Cosmic Fine-Tuning

The constants that make life possible are tuned to a precision that chance cannot credibly explain.

03 Biological Information

DNA is a digital code — and in all human experience, specified code originates from a mind.

04 The Origin of Life

Seventy years of research have widened, not closed, the gap between chemistry and a living cell.

05 Logic & Intelligibility

The universe is intelligible and mathematical — exactly what you would expect if a rational mind holds it together.

06 Messianic Prophecy

Texts dated before the events describe the life, death, and vindication of the Messiah in striking detail.

07 NT Reliability

No document from the ancient world is better attested than the New Testament.

08 The Resurrection

The facts accepted by the majority of scholars — skeptical and believing alike — are best explained by a resurrection.

09 Objective Morality

If objective moral truth is real, naturalism cannot ground it — a Moral Lawgiver can.

10 Transformation

Faith claims to transform people — and the measurable data says it does.
